5. In the Personal Hotspot menu, move the slider next to Personal Hotspot to on. The blue circle shows your wifi password. If you tap on this option you can change the password. However, unless directed you should leave this password at the default settings.

6. To connect your PC to the hotspot click the wireless network icon on the bottom right of your screen by the battery and speaker icon.

7. Then click on iPad in your wireless connection list

## 8. Then click Connect
